#1

The likelihood of a car to flip randomly is highly unlikely because of physics.

The odds for one person to beat 3 people in a team in pokémon is highly unlikely.

If you experiment how long glass can stay in heat until it turns into sand it could be up to 4 hours till it turns into sand.

#5

Improbable = unlikely, impossible, implausible

implausible = unlikely, impossible, improbable

probability = chance, possible

equal = chance, even, odds

Certain = possible, most likely, highly likely, definitely

outcome = possibility, experiment, answer

plausible = possible, most likely, chance, certain

likelihood = likely, chance, most likely

odds = chance, possibility, possible

experiment = outcome, answer, plan, draft

#9

improbable = 8/10

implausible = 9/10

probability = 9/10

equal = 10/10

certain = 10/10

outcome = 10/10

plausible = 8/10

likelihood = 9/10

odds = 10/10

experiment = 10/10

#34 What am I?

I can't defy physics

I am negative language

I am another word for impossible

I am even

I have a chance

I am probability

I am an answer

I come from an experiment

I am used in probability
